4-5-16 PH Proposed Plan revisions.docx

Silvina,

I finished comparing the dredging section in the technologies to the new FS Section 3 (got to page 27). I will work on finishing the other technologies and the Application of Technologies section tomorrow.

Can you work on the Remedial Alternatives section?

- start plugging in the updated numbers from FS Section 3 for each alternative
- figure out if we want more info about Alternative C in there
- figure out which stats we don't need, ex: estimated volumes of material needed for capping...

Charters,

Please take a look at the Eco risk section on pages 17-18 and the Eco PRG section on page 21. We added a lot more detail in the Human Health Risk section and we are wondering if the eco section is now lacking. Can you see if you think that we are missing anything?

Thanks,

Annie
